MOHAMED MOUHIMINE

AI Model Trainer & Evaluator

Strasbourg, France | +212 7 22 45 81 03 | mohamedmouhimine@gmail.com
GitHub: github.com/Aksachlisimo | LinkedIn: linkedin.com/in/mohamed-mouhimine

SUMMARY

Junior Machine Learning professional with a strong focus on AI model training, LLM evaluation, and prompt engineering. Hands-on experience improving AI reliability through structured evaluation, data annotation, and prompt-level feedback in production workflows.
Solid foundation in Python, machine learning fundamentals, and applied ML projects.

WORK EXPERIENCE

AI Model Trainer — Invisible AI | Oct 2025 – Present

- Training and evaluating AI model outputs across NLP and LLM-related tasks
- Performing data annotation, quality review, and structured evaluation to ensure high-quality and reliable model behavior
- Applying prompt-level feedback and evaluation guidelines to improve instruction-following
- Working within large-scale production workflows to meet quality, consistency and turnaround benchmarks

AI Model Trainer & Evaluator — Outlier AI | Nov 2024 – July 2025

- Engineered prompts for GPT-based LLMs, improving factual accuracy by 15% in benchmarks.
- Scored 1,000+ outputs for factuality and instruction-following to ensure reliable model behavior.
- Performed fine-grained NLP evaluation and data annotation for alignment tasks
- Worked with team on classification and generation model benchmarks

EDUCATION

Introduction to Artificial Intelligence with Python
Introduction to Programming with Python — **Harvard University | 2026**

- Implemented Python projects involving search algorithms, data structures, basic machine learning concepts and problem-solving

ZTM Complete AI & Machine Learning Bootcamp — **ZTM | Apr 2025 - Nov 2025**

- Curriculum: Python, Machine Learning, Deep Learning, NLP, Prompt Engineering, Data Analysis

Associate's Degree in Web Development — **STUDI | May 2024 - Jan 2025**

SKILLS

- **Machine Learning & AI :** Supervised & Unsupervised Learning, NLP, LLM Evaluation, Prompt Engineering, RLHF
- **Programming:** Python (Pandas, NumPy, Scikit-learn, TensorFlow, Keras), SQL
- **ML Tools:** Jupyter Notebook, Google Colab, Hugging Face Hub, Docker
- **Version Control & Deployment**: Git, GitHub, Postman

LANGUAGES

- English (Professional) | French (Professional) | Arabic (Native) | Turkish (Conversational)
